Preparation and Cooking

Griddle Fry: Apply cooking oil or spray to the skillet or griddle surface. Pour desired amount of eggs into skillet or griddle over medium heat (250-275°F). To scramble: as eggs begin to set, gently scrape the bottom and sides of the pan to create soft, fluffy curds. Continue gently scraping the pan every 10-15 seconds. Do not stir constantly or the eggs will break into tiny curds. Cook until eggs are set but still moist. Remove cooked eggs from pan, residual heat in the pan can dry and toughen the eggs. For filled omelets: as eggs begin to set, top with filling, loosen edges of omelet and fold in half.; Due to variance in equipment, heating time and temperature may require adjustment. Product should be heated to 165°F (74°C) internal temperature.

Thaw: To ensure adequate thawing, remove cartons from case and place in refrigerator, not to exceed 40°F (4.4°C). Space cartons to allow for air movement. Thaw, unopened, in refrigerator for 2-5 days.; Shake thawed carton well. Pour contents into cambro or large bowl and whisk with a wire whisk to obtain a homogeneous whole egg/scrambled egg mix. Refrigerate unused portion once thawed and use within 3 days. Do not refreeze.

Unknown: Use whenever whole egg is required in formulations and recipes.
