Preparation and Cooking

Griddle Fry: Apply cooking oil or non-stick spray to the skillet or griddle surface. Pour desired amount of eggs into skillet or griddle over medium heat (250-275°F). To scramble: as eggs begin to set, gently scrape the bottom and sides of the pan to create soft, fluffy curds. Continue gently scraping the pan every 10-15 seconds. Do not stir constantly or the eggs will break into tiny curds. Cook until eggs are set but still moist. Remove cooked eggs from pan, residual heat in the pan can dry and toughen the eggs. For filled omelets: as eggs begin to set, top with filling, loosen edges of omelet and fold in half.

Thaw: To ensure adequate thawing, remove cartons from case and place in refrigerator, not to exceed 40°F (4.4°C). Space cartons to allow for air movement. Thaw, unopened, in refrigerator for 2-5 days.; Due to variance in equipment, heating time and temperature may require adjustment. Product should be heated to 165°F (74°C) internal temperature.

Unknown: Use whenever egg white is required in formulations and recipes for baking. Use to make protein drinks and smoothies.; Shake thawed carton well. Pour contents into cambro or large bowl and whisk with a wire whisk to obtain a homogeneous whole egg/scrambled egg mix. Refrigerate unused portion once thawed and use within 3 days. Do not refreeze.

Serving Suggestions

Healthier low fat & low cholesterol alternatives to whole eggs such as scrambled eggs, soufflés, omelets and burritos/wraps. Great for whipping egg whites for countless baking and pastry applications or for adding protein to smoothies.
